Executive Summary

The Technology Improvement Program focuses on investing in new technologies and addresses the risk of obsolete existing technologies through a periodic Fitness Assessment to identify and mitigate the risk of service interruptions as part of the strategic goal around Risk Management. This offer supports the upgrade of key of the County's database infrastructure known as SQL Server. This infrastructure supports nearly all of the County's business applications and is a critical component of our infrastructure.

Program Summary

This offer upgrades the SQL Server platform and migrates the existing data for select systems. The data used by the department systems are stored in SQL Server databases. The vendor (Microsoft) provides version upgrades and security updates to these routinely. As they release new versions, the vendor discontinues the support for older versions. The County has several database systems that are due for upgrades as they are going to be out of the vendor support cycle. This very critical project is complex and must be coordinated. This program offer will fund the incremental work on this project.

This is Phase 2 of this project. Phase 1 was part of our FY 2022 funding.
