

What You Are Observing In The

GREEN ROOM

Trays of ballots that have been sorted into precinct order arrive in this room for secure storage.

The trays are placed on a cart. Each cart represents a single precinct.

The Green Room team rechecks the ballots to ensure they are in the proper precinct box.

Ballots are held in this secure area until the opening board process begins up to 7-days prior to Election Day (E-7).

Once we are at E-7, the Green Room personnel begin to move the ballots to the Basement Room teams where the actual ballot is separated from the envelope and processed.
