Final Results	Acceptable				

You must provide an explanation for the difference between the original results and the hand count results in the space provided below:

There were 3 additional ballots counted by the hand count board that were not counted by the tally machine. There are two possibilities:
 Filing error: it is possible that ballots from a precinct in close proximity on the shelves in the counting room were filed in this box in error
 Operator error: it is possible for the operator to have not run these three ballots through the machine.
 The presence of three additional ballots accounts for the 3 additional votes for Kitzhaber during the hand count.

While there are no marginal votes noted. The hand count board deliberated for a considerable amount of time on a ballot that the machine might have counted as a vote for Rebecca Duncan that the machine probably read as an undervote.

The hand count board decided based on the criteria set forth in the VBM manual that this should be counted an undervote.

Board found two exception ballots. One had a dark erasure smudge in the no bubble that was most likely counted as a no vote but should have been counted as an undervote. The other was a small dot in the Yes bubble of the measure but the board decided that this one was probably counted correctly as an undervote.
