MULTNOMAH COUNTY HEALTH DEPARTMENT

School-Based Health Center Program

*Uniting Health and
Education for Success in
School and Life!*

VISION

The vision of the **Multnomah County Health Department School-Based Health Center Program** is to facilitate access to comprehensive preventive, primary, and mental healthcare for Multnomah County school-age youth to keep them healthy and ready to learn.

MISSION

In partnership with schools, families, healthcare providers and community agencies, Multnomah County School-Based Health Centers:

- Provide culturally sensitive and age-appropriate healthcare, education, outreach, and referrals to school-age youth;
- Facilitate early identification of high-risk behaviors and health issues to enable timely intervention and treatment;
- Reduce barriers to healthcare by being conveniently located in schools and by offering confidential care in a safe environment regardless of insurance coverage and ability to pay;
- Promote healthy lifestyle choices and empower youth to take responsibility for their health and healthcare;
- Encourage parent or guardian involvement to support and sustain successful health outcomes.

WHO WE SERVE

School-based health centers serve the elementary, middle, and high school-aged youth of Multnomah County. Students at schools without a school-based health center can receive services at a listed SBHC according to grade range.

PRIMARY CARE SERVICES

- Routine physical exams, including sports physicals
- Early detection, diagnosis, and treatment of illness and injury
- Vision, dental, and blood pressure screenings
- Immunizations
- Mental health services
- Age-appropriate reproductive health
- Routine lab tests
- Prescription medications
- Health education, counseling, and wellness promotion
- Fitness and nutrition education and counseling
- Referrals for healthcare services not provided at the health centers

COST

School-based health centers are funded through third-party insurance, Medicaid, grants, and public funds. Providing us with your insurance coverage information allows us to bill your insurance and reduces our need for public funding so we can provide service to as many students as possible.

Families with no health insurance or who do not provide insurance information are referred for screening to see if they qualify for the Oregon Health Plan/Healthy Kids or other insurance programs. This coverage could fully insure your child for medical, dental, and emergency services. We strongly encourage you to apply for this valuable coverage.

If your insurance doesn't pay for all or part of the cost you are not responsible for any out-of-pocket expenses for services received at a school-based health center.

STAFF

The staff at a school-based health center includes:

- Office Assistant
- Nurse Practitioner (NP)
- Certified Medical Assistant (CMA) or Licensed Practical Nurse (LPN)
- Community Health Nurse (RN)
- Mental Health Consultant (MHC) (most sites)
