**Executive Summary**

The IDDSD Adult Services team supports quality of life for individuals with intellectual and developmental disabilities. Cerebral palsy, autism, and intellectual disability are examples of intellectual and developmental disabilities. These are disabilities that a person is born with, or that develop during childhood. They usually continue over the lifetime. The Adult Services team supports personal development, social inclusion, health, safety, and self-determination. This team provides service coordination, monitoring, support plans, needs assessments, and risk assessments, and supports individuals with connections to resources. All services are inclusive, culturally specific and culturally responsive and support clients to make informed decisions based on their goals.

**Program Description**

**ISSUE:** Adult Services address the need for home and community based long-term support. Our system has ended expensive and isolating institutional care. Instead, Adult Services help people maintain their independence, health, and safety. They also help people live and work within the community.

**PROGRAM GOALS:** The eight domains that adult services operate to support quality of life include: emotional, material, and physical well-being, interpersonal relations, social inclusion, personal development, self-determination, and rights. The goals of Adult Services are aligned with these domains. The goals include the following. First, assist individuals in accessing a living situation of their choice. Second, provide planning and supports that increase client achievement of personal goals. Third, support clients in connecting to and using both funded and natural supports. Fourth, maintain and improve the health and safety of clients. Fifth, increase the life choices available to clients. Sixth, optimize client involvement in education, employment, and purposive activity. Adult services center the cultural and linguistic needs of clients. This increases service equity and improves client outcomes.

**PROGRAM ACTIVITY:** The five areas of activity aligned with the goals above include assessment, connection, service coordination, monitoring, and documentation. Assessment efforts include needs assessments to determine service levels and categories. Connection efforts link clients to education, employment and residential resources, including affordable housing. Connections are also made to social activities. Service coordination efforts include ongoing person-centered planning. This planning identifies interests, strengths, choices, goals, and a path to goal achievement. These are recorded in an Individual Support Plan. Monitoring efforts include regular monitoring of service providers. This ensures the health and safety of clients. Monitoring efforts also include partnerships with Community Justice, Mental Health and Addiction Services, Vocational Rehabilitation, and Crisis Services. Finally, staff document all service and client data in state and county databases. Documentation is a Medicaid requirement.
