Executive Summary

In their lifetimes, 1 in 4 women and 1 in 9 men will experience domestic violence. To serve a diverse community of survivors, our system must be collaborative. Domestic and Sexual Violence Coordination provides planning, coordination, evaluation, and support for the continuum of domestic and sexual violence services in Multnomah County

Program Description

ISSUE: Domestic violence is a leading cause of violent victimization, accounting for more than 40% of all reported violent crime and 25% of all homicides in Multnomah County. Multnomah County spends an estimated \$10 million addressing domestic violence-related criminal costs and \$2.5 million in victim services annually. Domestic violence is a complex issue that requires a coordinated countywide response that focuses on prevention and support for survivors.

PROGRAM GOAL: The goal of the program is to address domestic and sexual violence and support the full continuum of domestic and sexual violence services. Coordination is a key piece of the response. This supports system-wide collaboration and leadership for our community. It also supports our system to work toward improving our services, making them more accessible, and ensuring that the voice of survivors is at the center of our efforts.

PROGRAM ACTIVITY: This program undertakes 4 key activities. First, we coordinate system-wide collaboration for the continuum of domestic and sexual violence services. We staff several advisory bodies centering the lived experience of survivors, especially BIPOC survivors and those from underserved communities. We also connect with service providers from across the system to lead system improvement efforts. Second, we lead community engagement work with participants and service providers. This includes engaging survivors from diverse backgrounds as leaders and experts. Third, we provide contract support for the full continuum of funded service providers. We support contract compliance as well as problem solving and connection with program staff. Finally, our work focuses on system-wide quality improvement and planning for future programming.
