Program Characteristic	s:			

Executive Summary

The Sex Offender Supervision and Treatment program is a critical public safety function that provides oversight for the comprehensive supervision, treatment and management of approximately 1,000 sex offenders annually living in Multnomah County. The priorities of this unit are to increase community safety, decrease sexual victimization and reduce recidivism. This program achieves these goals through evidence-based supervision strategies combined with sexual offense specific treatment practices.

Program Summary

This program is managed by the Adult Sex Offender Supervision Program Community Justice Manager. Supervision of approximately1000 sex offenders is conducted by certified Sex Offender Specialist Parole/Probation Officers (PPO). High and medium risk offenders are supervised in one of three field offices. In accordance with evidence-based practices, only high and medium risk indigent offenders are eligible for subsidy treatment funds. Sex offenders identified as lower risk to sexually reoffend are assigned to the Sex Offender Reduced Supervision Caseload (program offer 50056) after a period of documented compliance.

This program requires offenders to participate in a comprehensive evaluation, sexual offense specific treatment and ongoing evaluation of risk provided by 25 approved community treatment providers. Polygraph examinations are required for monitoring compliance with treatment expectations and supervision conditions.

This program has a direct impact on community safety and maintains high standards for offender accountability. Research has shown offenders who successfully participate in sexual offense specific treatment are less likely to reoffend than those who fail to participate in treatment (Craig et al., 2003; Hanson et al., 2009; Lovins et al., 2009; McGrath et al., 2003). Sexual and general recidivism rates of treated sex offenders has also been shown to be lower than recidivism rates of untreated sex offenders (Looman et al 2000; Hanson et al 2002). The use of polygraph examinations is invaluable in the management and treatment of sex offenders due to the information gained through the examination process. Furthermore, the use of polygraph examinations is also associated with a decline in recidivism rates (Cole, 2006; Edson et al., 2007; English et al., 2000; Krueger, 2009).

Performance Measures						
Measure Type	Primary Measure	FY13 Actual	FY14 Purchased	FY14 Estimate	FY15 Offer	
Output	Number of adult sex offenders served anually	new	new	1050	1050	
Outcome	Percent of offenders that do not sexually recidivate one vear post exit	95%	95%	95%	95%	
Performance Measures Descriptions						

Recidivism is based on new felony convictions.
