Multnomah County				
Program #40008B - Vect Replace Vector Boat	or-Borne Disease Prevention and	Code Enforcement –		7/7/2014
Department:	Health Department	Program Contact:	Chris Wirth	
Program Offer Type:	Existing Operating Program	Program Offer Stage:	As Adopted	
Related Programs:	40007, 40037			
Program Characteristics	: One-Time-Only Request			

Executive Summary

The Vector Control program is requesting approval of \$49,000.00 for a one-time addition to purchase a replacement boat to be able to continue to provide mosquito control and surveillance services. The program's current boat is nearly 15+ years old and is showing significant wear including some holes to the body causing water leaks and safety issues. This one time offer is not a staff increase but instead replaces an aging, nearly defunct boat for mosquito control and surveillance activities.

Program Summary

All constituents of Multnomah County would be served by a replacement boat allowing Vector Control to continue with their integrated control and surveillance of mosquitoes in areas of mosquito habitat throughout Multnomah County. The direct areas affected would be the large, expansive communities and businesses that are adjacent to the Columbia Slough, Willamette and Columbia River shores and islands including West Hayden Island, Jantzen Beach, and Sauvie Island. Additionally, because adult mosquitoes can travel up to 7 miles, inland areas within their flight range are also served by the control and surveillance of mosquitoes assisted by boat.

Multnomah County's climate supports ideal mosquito and rat habitats. Mosquito control began in the county in the 1930's when malaria was endemic. In 2013, sixteen counties in Oregon reported 109 mosquito-cases of West Nile Virus – an increase since last year. Additionally, the county had a human case that was acquired out-of-state. It is necessary to maintain current levels of surveillance and control to ensure early prevention and suppression of this disease using World Health Organization and Center for Disease Control best practices. Vector Control protects the community by serving all populations, while focusing on the vulnerable (i.e. elderly, children, homeless). The citizenry understands and expects these program functions.

Objectives: Abate and or suppress mosquitoes that carry West Nile Virus with pesticides with the least impact, reduce the population by water control and vegetation management to reduce breeding habitats.

Components: Mosquito Control - majority of funds/staffing.
