Hi Kevin,

This is Marshall Meyer. As you may remember, last summer, I was inquiring regarding about the possibility of having a porta potty available at the main parking lot and Tri-Met stop on the island side of the bridge. I don't believe I will be able to make it Monday, but wondering if you would be able to pass on my concerns. Because the Tri Met potty is for employees only and there are few other options available on most bike loops, there a few options available before or after a long bike ride or run. Options for women are even more problematic.

No one wishes to disturb private property or not be good citizens, so I was hopeful the board could look into options prior to the spring riding season. What would it take to have another potty on the lot or share some costs with Tri Met to make their bathroom more public?

I noticed from previous minutes that this issue may have been brought up before?

You have a beautiful island and we all would like to continue to be very respectful.

Marshall
