Executive Summary

The Tobacco Control and Prevention Program uses a variety strategies to prevent and reduce tobacco and nicotine use and exposure in Multnomah County with particular attention to reducing tobacco-related racial and ethnic disparities.

Program Summary

Tobacco use is the single most preventable cause of disease, disability, and death in Multnomah County and across the nation. Although cigarette smoking has declined in Multnomah County, disparities in tobacco use remain across groups defined by race, ethnicity, educational level, and socioeconomic status. Nearly 1,274 residents die prematurely from tobacco use each year, and more than 23,395 suffer from a disease caused by smoking. Despite these risks, approximately 114,750 Multnomah County adults currently smoke cigarettes. And the harmful effects of smoking do not end with the smoker. Secondhand smoke exposure causes serious disease and death, and even brief exposure can be harmful to health. Coupled with this enormous health toll is the significant economic burden. Currently an estimated \$233.9 million is spent on tobacco-related medical costs and \$187.5 million is lost in productivity due to premature tobacco-related deaths.

Components of the program include: implementation of strategies to reduce youth access to, and use of, tobacco and nicotine products, establishment of policy/regulation, counter-marketing, promotion of smokefree environments, providing support and resources to smokers who want to quit, surveillance and evaluation, and engaging diverse communities in tobacco prevention efforts in order to reduce tobacco-related disparities. Tobacco retail licensing components include: annual compliance inspections, minimum legal sales age inspections, trainings, outreach and consultation in order to increase retailer compliance with all laws related to the sale of tobacco and nicotine products and decrease access and availability of these products within Multnomah County.
