Significant Program Changes

Last Year this program was: 40023 East County Health Clinic

Health transformation has created instability in fee revenue estimates for Primary Care and could force significant changes in coming years. In FY13, Primary Care fell short of fee revenue estimates and is expected to do the same in FY14. New models of care were implemented in response to health care reform, but reimbursement has not changed to match these changes in the care model. Additionally, a decline in provider visits while implementing these changes also impacted revenue. There are positive changes already from Medicaid expansion, but it is too soon to tell what the lasting impact will be on revenue. Even though very reasonable methods were used to create the FY15 revenue projections, they are very aggressive when compared to current fee income. While achievable there remains uncertainty about how quickly all of the changes in the healthcare environment will settle making forecasting more predictable.
