

Division: Corrections Health

Program Characteristics:

Program Description

This program provides Behavioral Health services and implements suicide prevention for clients at all facilities served by Corrections Health. Our records indicate that at least 70% of our Adults in Custody (AIC) have a mental health diagnosis. Treatment includes assessment, therapy, psycho-education, crisis intervention, and care coordination. A Caseload Model supports effective transitions between facilities, and Licensed supervisors monitor care for compliance. Subject matter experts train staff on client safety and access to behavioral health care, including interdisciplinary implementation of the Columbia Suicide Severity Rating Scale (C-SSRS) and the Safer Suicide Care team.

Due to acute needs, Mental Health (MH) leaders rotate to maintain 24/7 availability for urgent direct care, including potential emergency department referral, communicating imminent risk, and screening for involuntary transport per Oregon Civil Commitment Laws. We deliver behavioral health services to a broad and diverse population, including those disproportionately represented in the system. Our equitable service delivery model depends on employing staff with culturally specific knowledge and supporting cultural competency aligned with facility demographics, including LGBTQIA2S+ individuals and Black, Indigenous, and other people of color. High quality clinical supervision and data-driven program development support equitable care for all clients.

This program offer may be impacted by a Chair's budget reduction.

Equity Statement

Due to systemic inequities and unjust systems, Adults and Youth in Custody (AICs and YICs) are disproportionately from Black, Indigenous, and People of Color (BIPOC) communities. Providing high-quality, complete care in county jails and detention centers is essential for ensuring those negatively affected by racism and trauma receive the care they deserve.
