

Division: Behavioral Health

Program Characteristics:

Program Description

The Quality Management (QM) Unit supports the Behavioral Health Division (BHD) with the following essential infrastructure: Compliance, Electronic Health Records (EHR), Reporting, and Revenue. These teams deliver legally required and vital functional and safety services to client-facing programs, while also helping retain the workforce by aiding in staff onboarding, providing tools and training, and enhancing divisional efficiencies.

1) The Compliance team ensures adherence to regulations and policies, helping BHD quickly identify, stop, and reduce risks to client and staff safety. It conducts internal and external investigations and audits, assists with staff onboarding, develops BHD policies, reviews contracts, oversees credentialing, manages critical incidents and grievances, implements corrective measures, and offers technical support. 2) The Evolv team locally oversees the EHR, maintaining, updating, and customizing Evolv to meet clinicians' needs and ensure compliance with clinical documentation requirements. 3) The Records team manages all clinical records in Evolv with a limited scope in Epic, ensuring secure entry into Evolv and Epic, fulfilling records requests, maintaining EHR integrity, and evaluating deletion requests for privacy issues. 4) The Reporting team provides timely data to measure outcomes, demonstrate responsible use of public funds, and inform program development. 5) The Revenue team increases billable revenue by managing authorizations and claims for Direct Clinical Services, Multnomah Treatment Fund, and other Multnomah Alcohol and Drug treatment services, reviewing claims for accurate documentation and reimbursement.

Equity Statement

These teams advance equity by providing real time information and data on systems, programs, and policies that perpetuate systemic barriers to opportunities and benefits for Black, Indigenous and People of Color (BIPOC), those with behavioral health needs, and other underserved populations.
