Executive Summary

The Adult Mental Health Initiative (AMHI) Renamed by the Oregon Health Authority (OHA) to The Choice Model Program as of 7/1/16: diverts individuals from Oregon State Hospital (OSH); coordinates successful discharge from OSH into appropriate community placements and services; coordinates care for individuals residing primarily in licensed residential facilities in order to move individuals into the least restrictive housing possible; and coordinates care and develop supports to maximize independent living; 721 individuals were served in FY19.

Program Summary

The Behavioral Health Division's Choice Model staff work with other Division units, OSH, OHA/Health Systems Division, Coordinated Care Organizations (CCO), and counties to coordinate the placement and transition of individuals primarily within a statewide network of licensed housing providers. New or enhanced services offered by Choice can include: supported housing development and rental assistance to increase housing options matched to client need; Exceptional Needs Care Coordination (ENCC) to assure access to appropriate housing placements and the development of supports to increase success in the community; referrals to community mental health programs; referrals to Supported Employment to help move clients towards greater independence; and transition planning management to assure the most efficient utilization of the licensed residential housing stock within the community.

The overarching goal of the Choice Model program is to assist individuals to achieve the maximum level of independent functioning possible. This goal is achieved by diverting individuals from admission to OSH; supporting quick, safe and appropriate discharges from OSH into the community; and providing supports (skills training, etc.) to help individuals achieve independent living in the least restrictive housing environment.
