**Executive Summary**

This program offer describes the existing continuum of adult mental health care funded by Oregon Health Plan and managed by Health Share Multnomah Mental Health. The continuum addresses the needs of adults at emergent, urgent & routine levels of care. Additional respite services provide intervention when an individual's symptoms have risen beyond the scope of outpatient treatment. Outpatient treatment services provide a range of care matched to diagnosis and acuity to approximately 9,000 adults annually.

**Program Summary**

Adult mental health outpatient services provide a comprehensive array of treatment options that address the needs of each individual, including several categories of individual and group therapy, general and intensive case management for individuals with severe mental illness, intensive outreach and medication management. Outpatient services address long and short-term mental health needs to lessen the need for hospitalization. Since expansion of Oregon Health Plan an average of 5200 adults receive outpatient services each month, with many remaining in treatment for several months. The average number of adults receiving services each month increased by 16 percent in FY15.

Mental health respite services are a community-based approach to stabilize individuals whose symptoms have exceeded the scope of outpatient treatment. The goal is to prevent hospitalization through early intervention with short-term, intensive residential treatment. Respite care contains a range of treatment options, including medication management, clinical treatment and post-discharge transition planning. It has been defined as a best practice when used in a continuum of treatment services.
