Executive Summary

The Early Assessment and Support Alliance (EASA) is an early psychosis intervention program addressing the needs of young persons aged 15-25 who demonstrate initial symptoms of psychosis, with the goal of managing long-term problems and consequences. EASA offers formal psychiatric treatment services as well as vocational and educational support, and involves the young person's family in treatment. The program will provide services for approximately 160 clients.

Program Summary

The EASA team identifies young people experiencing the first episodes of psychosis and offers them a broad array of individualized treatment avenues and community-based care. Services include assessment, treatment planning, case management, medication management, psycho-educational workshops, multi-family groups, occupational assessments and interventions, evidence based supported employment services and educational supports. These services are provided by a multidisciplinary team that includes a psychiatrist, a nurse, a vocational and occupational therapist, peer support specialist and mental health consultants. The team's composition and activities are designed to meet the standards of a defined evidence-based practice model as required by the state. Research suggests that the median age for the onset of initial episodes of psychosis is under the age of 25. Research also suggests that early intervention and immediate access to treatment can directly reduce hospitalization rates and the incidence of psychosis' long-term disabling consequences.

Performance Measures

Measure Type	Primary Measure	FY15 Actual	FY16 Purchased	FY16 Estimate	FY17 Offer
Output	Total individuals enrolled in the EASA program receiving services	142	77	140	140
Outcome	% reduction in hospitalization rate 3 months pre and 6 months post enrollment (1)	75%	75%	75.0%	75.0%
Output	Number of unduplicated individuals referred to the EASA program	194	141	170	170

Performance Measures Descriptions

¹ This measure compares the hospitalization rate for the three months prior to services with the rate for the 6 months post EASA service enrollment which is an indication of the stabilization of the individual.
