**Executive Summary**

The Care Coordination Unit was formed in 2020 in the Behavioral Health Division as a result of CCO 2.0 and provides care coordination for all ages f, including: Wraparound, Youth & Adult Intensive Care Coordination (ICC), & the Multnomah Intensive Care Coordination Team (M-ITT). Wraparound and Youth ICC provide a broad range of care coordination services and work within the multi-tiered Children System of Care Governance Structure to address cross system barriers for youth and families. Adult ICC provides integrated care coordination to adults with complex behavioral health needs to improve health outcomes and experience. M-ITT provides short term care coordination and case management to support adults during and after a psychiatric hospitalization to connect to community-based services.

**Program Description**

Wraparound, Youth & Adult ICC are funded by Oregon Health Plan via a delegation agreement with Coordinated Care Organization(s). M-ITT is funded by HealthShare as part of the Crisis Services continuum of care. Care Coordinators partner with Primary Care Providers, Community Behavioral Health Providers, Department of Community Justice, Housing Providers, Intellectual Developmental Disabilities (IDD), Oregon Department of Human Services (ODHS), Child Welfare, School Districts, Peer Service Providers, and other stakeholders to improve care and outcomes for clients.

ICC and Wraparound Care Coordinators engage in a team planning process with adults, youth, family and community partners and providers to develop a unified, strengths-based plan to address individualized needs. For youth participating in Wraparound services, their plan of care is youth-driven, family-guided, culturally responsive, multidisciplinary and includes both formal and natural support. The goal is to help youth address mental health needs in order to be healthy, successful in school, and to remain in their communities. Youth and Adult ICC support individuals (and their families) with complex behavioral health needs with developing individualized care plans to: meet physical, oral, behavioral health, substance use, and psychosocial goals. ICC facilitates transitions between mental health services; ensures team communication; and connects with community services and supports. M-ITT provides rapid engagement to adults exiting psychiatric hospitals who are not connected to an outpatient behavioral health provider to provide short term intensive support and connect them to ongoing behavioral health services and other community support services including Primary Care, shelter, and other services to address client needs.

Programs ensure policies, procedures and services are individualized and culturally and linguistically responsive. Staff are recruited and retained to reflect the communities served with several bicultural and bilingual staff available to work with LGBTQIA+, Native American, African-American, Latinx and Spanish speaking clients. Peer Services are contracted out to qualified providers.

**Performance Measures Descriptions**

<sup>1</sup>WFI-EZ data is not representative of program outcomes. WFI-EZ completion rates across nearly all of Oregon are below best practice standard rates. Barriers to completion of this voluntary survey included participant pandemic-related burdens and challenges with the WFI-EZ database. Statewide training/support was provided in 2022 in addition to increased Multco administrative support, to try and improve 2023 data.

## Significant Program Changes

**Last Year this program was:** FY 2023: 40081 Multnomah County Care Coordination

M-ITT length of enrollment continues to be longer than ideal due to limited outpatient system capacity due to workforce which results in fewer total clients being served by the MITT program than in earlier years.
