Executive Summary

Program Design and Evaluation Services (PDES) has received federal and state COVID-19 funding to provide ongoing support to the Oregon Health Authority Office of the State Public Health Director. The scope of work includes collaborating with BIPOC community partners to improve public health data systems; analyzing and reporting on COVID-19 measures; and creating COVID-19 modeling reports. Activities support both statewide and local needs.

Program Summary

Program Design and Evaluation Services (PDES) is a research and evaluation unit within both the Multnomah County Public Health Office of the Director and Oregon Health Authority Public Health Division. PDES will utilize federal and state COVID-19 funding for the following activities in FY23:

Collaborate with BIPOC community partners - PDES will work with partners to describe the impact of COVID-19 on their communities and improve data systems for response planning, recovery, and preparedness. Community based scholars and community based organizations for five BIPOC communities will be funded to lead the project for their communities.

Analyze and report on COVID-19 measures - PDES will analyze and report monthly on current statewide measures of the far-reaching impact of COVID-19 and identify new measures for inclusion. Expanded measures will provide a comprehensive picture for assessing the impact of COVID-19 both statewide and locally, alongside data on COVID-19 cases, testing, vaccinations, hospitalizations, and deaths. Data will be disseminated publicly online.

COVID-19 modeling reports - PDES will create modeling reports for Oregon that will be shared with Oregon Health Authority leadership, as well as local leadership, every two weeks until COVID-19 cases remain at a low-risk level. Modeling reports will be created as needed thereafter. Reports include both estimates over time and scenario planning.
