Program Characteristics:

Executive Summary

The Early Assessment and Support Alliance (EASA) is an early psychosis intervention program addressing the needs of young people aged 12 to 25 who demonstrate initial symptoms of psychosis or are found to be at high risk for developing psychosis. The goal of the program is to develop a long-term recovery and support plan. EASA is a two-year program that offers formal mental health treatment services, educational support, employment support. The program engages the young person’s family and their other natural supports in treatment. This program offer funds one additional Case Manager for the EASA program. This Case Manager will support approximately 50 individuals per year.

Program Description

This funding adds \$133,333 and 1.00 FTE Case Manager to fund an expansion of the EASA program. EASA is an evidence-based and fidelity-based model resulting from 14 years of research that demonstrates early intervention and immediate access to treatment can directly reduce psychiatric hospitalization rates and the long-term debilitating consequences of psychosis. The EASA fidelity-based model helps young people impacted by psychosis develop long-term recovery plans.

The multidisciplinary team approach and program activities and services are designed to meet the fidelity standards of the model as required by the state. The team includes both a child/adolescent and an adult psychiatrist, mental health consultants, a peer support specialist, employment specialists, an occupational therapist, and a nurse. The team has been formed to include linguistically and culturally specific consultants to reflect the population served.

Treatment is community-based and consists of services tailored to meet the unique needs of each client. Clients are matched with a psychiatrist and a mental health consultant based on age, personal preferences, and cultural needs. Clients can choose from any of the following services to support their unique goals and needs: medication management, case management, support for employment, psychiatric nursing services, peer support, occupational therapy assessment and intervention, multi-family group, individual and/or family psychotherapy, psychoeducation, and social skills building groups.

This program adds \$133,333 in Early Assessment and Support Alliance funding and 1.00 FTE to the Behavioral Health Division. These funds were awarded by the Oregon Health Authority to provide expanded EASA capacity in Multnomah County.

Performance Measures

Measure Type	Primary Measure	FY22 Actual	FY23 Budgeted	FY23 Estimate	FY24 Offer
Output	Total number of unduplicated referrals supported by the case manager	N/A	50	25	N/A
Outcome	% increase of clients connected to resources through case management services ¹	N/A	20%	N/A	N/A
