Executive Summary

Assessment and Treatment for Youth and Families (ATYF) is a unique public safety program serving medium and high risk probation youth with substance abuse, mental health and/or behavioral problems who cannot be effectively treated in community-based programs because of severe delinquency. ATYF provides clinical assessments and outpatient treatment to approximately 140 probationers per year. In conjunction with these services, this program also provides mental health care coordination and intervention to over 300 detained youth each year.

Program Summary

ATYF therapists administer an evidence-based clinical assessment, the Global Appraisal of Individual Needs (GAIN) which provides a comprehensive analysis of the youth's risks and needs, including specialized assessment and screening for youth adjudicated for fire setting charges. The therapists also develop and provide clinical recommendations to help the courts with dis-positional planning. This increases the likelihood that youth will receive appropriate treatment without compromising community safety.

ATYF therapists provide outpatient individual and family treatment using an evidence-based model, Multidimensional Family Therapy (MDFT). Services are provided in the youth's home, the clinic office, school and other community settings and focus on changing anti-social behaviors and reducing drug and alcohol use. Additionally, ATYF provides two Mental Health Consultants (MHC) for youth held in detention. Many of the youth served by these MHCs exhibit an array of mental health issues that require specialized care. The two MHCs in detention also assess for levels of intensity for youth at risk of suicide. They are essential qualified mental health professionals required to assess and recommend any reduction in a suicide watch or transfer to a hospital upon release from detention.

Research shows that youth with untreated substance abuse issues are nearly ten times more likely to become chronic reoffenders. Delinquent youth who receive substance abuse treatment have fewer re-arrests, convictions and detention visits (Cuellar, Markowitz and Libby 2004). ATYF keeps at-risk youth from re-offending and penetrating deeper into the justice system by linking them to treatment services that change their delinquent thinking and behaviors.
