GRADING AND EROSION CONTROL PERMIT

CASE FILE: T1-05-036

November 23, 2005

Request: This is a request to 1). retroactively authorize unpermitted placement of 400-500 cubic yards of earthen fill near the eastern property line, 2) to spread that fill over the eastern third of the property in a layer ranging from 4-6 inches thick and 3). To stabilize the disturbed areas with 140 trees, native grasses and vegetable gardens.

Location: 10971 NW Brooks Road
Portland, OR 97231

Applicant/ Donovan & Son Cha Porter
Owner: 10971 NW Brooks Road
Portland, OR 97231

ORDINANCE REQUIREMENTS:

Applicable standards for this permit can be found in Chapter 29.300 et seq., Grading and Erosion Control Code of the Multnomah County Building and Specialty Codes, copies of which are available at our office.

MODIFICATIONS AND LIMITATIONS:

This permit is based on written narrative(s) and plan(s) provided by the applicant (attached). No development shall occur under this permit other than that which is specified within these documents. It shall be the responsibility of the property owner to comply with these documents and the limitations described herein.

1. The property owner shall maintain best erosion control practices through all phases of development. Erosion control measures are to include the installation of sediment fence barriers at the toe of all disturbed areas, the placement of bio-bag barriers within the road side ditch towards the southeastern portion of the property, and post construction re-establishment of grasses and landscaping as indicated in the attached plans. Straw mulch, erosion blankets, or 6-mil plastic sheeting shall be used as a wet weather measure to provide erosion protection for exposed soils. All erosion control measures are to be implemented as prescribed in the current edition of the *Erosion Prevention Sediment Control Plans Technical Guidance Handbook*, copies

of which are available for purchase at our office, or through the City of Portland.

2. The County may supplement described erosion control techniques if turbidity or other down slope erosion impacts result from on-site grading work. The Portland Building Bureau (Special Inspections Section), the local Soil and Water Conservation District, or the U.S. Soil Conservation Service can also advise or recommend measures to respond to unanticipated erosion effects.
3. On-site disposal of construction debris is not authorized under this permit. Any spoil materials removed off-site shall be taken to a location approved for the disposal of such material by applicable Federal, State and local authorities. This permit does not authorize dumping or disposal of hazardous or toxic materials, synthetics (i.e. tires), petroleum-based materials, or other solid wastes which may cause adverse leachates or other off-site water quality effects.
4. The property owner is responsible for removing any sedimentation caused by development activities from all neighboring surfaces and/or drainage systems. If any features within adjacent public right-of-way are disturbed, the property owner shall be responsible for returning such features to their original condition or a condition of equal quality.

Prior to any land disturbing activities:

5. **The property owner shall pay a \$75 erosion control inspection fee to Multnomah County prior to initiating grading activities. The property owner shall also call Multnomah County Planning (503-988-3043) to schedule an erosion control inspection prior to initiating grading activities.**
6. The property owner shall verify that all sediment fences and bio bag barriers are properly installed and in working order prior to initiating grading activities.
7. **The erosion control permit notice (attached) is to be posted at the driveway entrance at NW Brooks Road in a clearly visible location (print towards Brooks Road). This notice is to remain posted until such time as the grading work is completed.** In the event this sign is lost, destroyed, or otherwise removed prior to the completion of the grading work, the applicant shall immediately contact the Land Use Planning Office to obtain a suitable replacement.

Follow up requirements after grading:

8. All disturbed areas are to be seeded or planted within fourteen (14) days of the date grading activities are concluded.

At this point, applications for building permits may be made with the City of Gresham (if necessary) after receiving a land use signoff from our department. When ready to have building permits signed off, call the Staff Planner, Adam Barber, at (503)-988-3043, for an appointment for review and approval of the conditions and to sign the building permit plans. Multnomah County must review and sign off building permit applications before they are submitted to the City of Gresham. Four (4) sets each of the site plan and building plan are needed for building permit sign-off as well as a \$75 erosion control inspection fee.
