GRADING AND EROSION CONTROL PERMIT

CASE FILE: T1-06-057

October 31, 2006

Request: Request to remove the existing dwelling and construct a new dwelling and septic system at 8222 SE 267th Avenue.

Location: 8222 SE 267th Avenue
TL 2300, 24C, T2N, R1W
R09260-1330

Applicant/ Scott Ogle
Owner: 12195 SE 312th
Boring, Oregon 97009

ORDINANCE REQUIREMENTS:

Applicable standards for this permit can be found in Chapter 29.300 et seq., Grading and Erosion Control Code of the Multnomah County Building and Specialty Codes, copies of which are available at our office.

MODIFICATIONS AND LIMITATIONS:

This permit is based on written narrative(s) and plan(s) provided by the applicant (attached). No development shall occur under this permit other than that which is specified within these documents. It shall be the responsibility of the property owner to comply with these documents and the limitations described herein.

1. The property owner shall maintain best erosion control practices through all phases of development. Erosion control measures are to include the installation of sediment fences/barriers at the toe of all disturbed areas, delineation and establishment of a grass preservation strip north of the drain line connecting the septic system to the home and post construction re-establishment of ground cover. A copy of the approved Erosion Control plan is attached as Exhibit A1. Straw mulch, erosion blankets, or 6-mil plastic sheeting shall be used as a wet weather measure to provide erosion protection for exposed soils. All erosion control measures are to be implemented as prescribed in the current edition of the *Erosion Prevention Sediment Control Plans Technical Guidance Handbook*, copies of which are available for

purchase at our office, or through the City of Portland.

2. Drainage of storm run-off attributed to this development shall be handled, on-site, with the soakage trench designs that are to be constructed consistent with the specifications signed by Craig Christensen, PE, dated August 31, 2004 (attached as Exhibit A2).
3. The County may supplement described erosion control techniques if turbidity or other down slope erosion impacts results from on-site grading work. The Portland Building Bureau (Special Inspections Section), the local Soil and Water Conservation District, or the U.S. Soil Conservation Service can also advise or recommend measures to respond to unanticipated erosion effects.
4. On-site disposal of construction debris is not authorized under this permit. Any Spoil materials removed off-site shall be taken to a location approved for the disposal of such material by applicable Federal, State and local authorities. This permit does not authorize dumping or disposal of hazardous or toxic materials, synthetics (i.e. tires), petroleum-based materials, or other solid wastes which may cause adverse leachates or other off-site water quality effects.
5. The property owner is responsible for removing any sedimentation caused by development activities from all neighboring surfaces and/or drainage systems. If any features within adjacent public right-of-way are disturbed, the property owner shall be responsible for returning such features to their original condition or a condition of equal quality.

Prior to any land disturbing activities:

6. The property owner shall verify that all erosion control measures are properly installed and in working order prior to initiating grading activities.
7. **The erosion control permit notice (attached) is to be posted at the gravel driveway entrance at 267th Avenue in a clearly visible location (print towards 267th Avenue). This notice is to remain posted until such time as the grading work is completed.** In the event this sign is lost, destroyed, or otherwise removed prior to the completion of the grading work, the applicant shall immediately contact the Land Use Planning Office to obtain a suitable replacement.

Follow up requirements after grading:

8. All disturbed areas are to be seeded or planted within fourteen (14) days of the date grading activities are concluded.

At this point, applications for building permits may be made with the City of Gresham after receiving a land use signoff from our department. When ready to have building permits signed off, call the Staff Planner, Adam Barber, at (503)-988-3043 x 22599, for an appointment for review and approval of the conditions and to sign the building permit plans. Multnomah County must review and sign off building permit applications before they are submitted to the City of Gresham. Four (4) sets each of the site plan and building plan are needed for building

permit sign-off as well as a \$77 erosion control inspection fee and \$53 building permit review fee.

Issued by:

Signed: Adam Barber, Planner
For: Karen Schilling, Planning
Director
