Executive Summary

The Business Applications and Technology (BAT) team supports the implementation and use of information systems and other technology solutions. The program uses data reporting tools to increase the effectiveness of staff and improve service delivery to internal customers, public safety partners, and the individuals and families we serve.

Program Description

The BAT team provides oversight for evaluation, selection, purchase and implementation of effective, innovative technology solutions. The team provides technological support and administrative functions across DCJ's portfolio of over 25 different information systems, and collaborates with County Central IT, partner agencies, and private service providers to develop system-wide technology solutions for data sharing.

This program offer contains services provided by the County's Information Technology organization, which facilitate support for information needs of DCJ, system partners, and the public. This includes the development, maintenance, on-going support of information systems to support business needs, easy access to data, purchase/replacement of computer equipment, software, and technology tools. These efforts further DCJ's focus on reducing racial and ethnic disparities to improve equitable service delivery.

BAT contributes to countywide priorities by managing DCJ's participation in the Service Coordination Portal Engine (SCoPE) project, the Public Safety Assessment (PSA) project, and DCJ's Paperless Files project. SCoPE is a multi-departmental data sharing application and BAT's involvement includes maintaining user access, performing quarterly system audits, and other data steward activities. The PSA application is part of the Local Public Safety Coordinating Council's (LPSCC) efforts to reform the Pre-Trial system in Multnomah County.

As the number of employees working remotely has increased, the need for BAT services and support within DCJ has increased and demand for technology projects continues to grow.
