**Executive Summary**

Department of Community Justice (DCJ) adheres to evidence-based risk principles to determine supervision levels ensuring resources are targeted to the highest risk. Multnomah County receives a large number of high risk individuals and is still able to produce lower recidivism rates for these cases compared to the state average. The Reduced Supervision model takes care not to bring justice-involved individuals (JIIs) who are low risk deeper into the criminal justice system, provides minimal supervision, and encourages increased self-sufficiency.

**Program Summary**

High risk supervision uses evidence-based strategies to identify criminogenic risk factors to supervise high-risk individuals on probation and parole. DCJ utilizes the Level of Service/Case Management Inventory (LS/CMI), the Women's Risk Need Assessment (WRNA) and the Public Safety Checklist (PSC) assessment tools to measure the risks and needs of adults. The LS/CMI is also a fully functioning case management tool that provides a summary of the individual's static and dynamic criminogenic risk and need factors, as well as special responsivity considerations to be deployed during supervision. The WRNA is a gender responsive risk assessment created with justice-involved women's social and psychological needs in mind. The PSC provides a quick, objective, validated assessment of the probability an individual will be re-convicted of a felony or rearrested for a person or property offense based on specific characteristics.

DCJ continues to use Effective Practices in Community Supervision (EPICS), an evidence-based case management model. With EPICS, parole-probation officers (PPO) follow a structured approach to their interactions with their clients, allowing PPOs to effectively target the criminogenic needs using cognitive behavioral interventions for high risk individuals. They also integrate trauma informed practices and brain science into their daily work.

PPOs reinforce law-abiding behavior and link clients to treatment, employment and other services. Supervision is conducted through: a) home and office visits; b) contacts with family; c) correspondence with community members and treatment providers; and d) collaboration with law enforcement agencies.

The COVID-19 pandemic impacted operations beginning in March 2020. PPOs have limited in person visits to address immediate public safety concerns and address high risk behaviors. They maintain contact with justice-involved individuals via phone or other virtual options. Regular in person meetings will resume in FY 2022 when it is safe to do so.

**Performance Measures**

Measure Type	Primary Measure	FY20 Actual	FY21 Budgeted	FY21 Estimate	FY22 Offer
Output	Number of high risk adults supervised annually in West Program	1,608	2,000	1,600	2,000
Outcome	Percent of adults who are convicted of a misd. or felony within 1 year of supervision start date	20%	15%	20%	15%

**Performance Measures Descriptions**

Measures 1 and 2: FY 2020 Actual and FY 2021 Estimate have been significantly affected by COVID-19. DCJ anticipates numbers will return to normal in FY 2022, as vaccine rollout completes in Summer 2021 and when court backlogs are resolved.
