Executive Summary

Electronic Monitoring (EM) allows staff to monitor the activities of pre- and post-adjudicated individuals in the community through house arrest, curfew monitoring, alcohol consumption monitoring, or the monitoring of an offender's movement in the community. Utilizing EM and Global Positioning Software (GPS) technology to minimize the movements of offenders within the community has proven to be a reliable, cost-effective way to sanction offenders and reinforce public safety and the safety of victims.

Program Summary

EM enables the County to utilize a restriction other than jail during pre-adjudication and post-conviction. EM allows Parole/Probation Officers (PPO) to know where high risk offenders are located at any given time. This alternative sanction expands supervision sentencing options for judges and creates cost-effective offender management by having the offender pay a portion of the equipment costs (based upon subsidy eligibility). Current data indicate most defendants and offenders on EM complete their obligation successfully. On average, 105 sanctioned individuals are supervised per day on EM, which translates to \$3.5 million in cost avoidance for the County on an annual basis.

This sanction further allows the offender the ability to maintain employment and continue participation in treatment groups. The EM Program provides case management assistance to PPOs by installing the bracelets, monitoring compliance, responding to program violations and maintaining an EM database.

The EM program is a collaborative, systems-oriented project that works closely with PPOs who in turn work with the Courts, the Oregon Board of Parole and Post Prison Supervision and the District Attorney's Office to enhance the success of individuals placed on community supervision.
