

# Advanced Specialty Pharmacy Services

## Managing your condition doesn't have to be complicated

Specialty drugs require special dosing, storage, handling and shipping. Managing your condition doesn't have to be as complicated.

US Specialty Care is dedicated to providing you with the medications, tools and resources you need to stay healthy. With our advanced pharmacy network, counseling services and industry-leading team of clinical pharmacists and Patient Care Advocates, US Specialty Care will help you manage your unique condition, creating a treatment plan that is effective and affordable.

## Working together to improve your health

We know that managing a chronic condition doesn't end once you receive your medication. Quality care requires participation by your entire health care team. That's why US Specialty Care works with you, your doctors and nursing staff to create a personalized treatment program that will provide the best possible outcome. US Specialty Care offers medication and services to treat many complex health conditions, including:

- Anemia
- Cancer
- Crohn's Disease
- Growth Hormone Deficiency
- Hepatitis C
- HIV/AIDS
- Immune System Disorders
- Infertility
- Multiple Sclerosis
- Osteoporosis
- Psoriasis
- Respiratory Disease
- Rheumatoid Arthritis

## Complete patient support

Our pharmacy fully supports you through the convenience of:

- **Medication delivery:** We know that getting your medication on time is important. Your medications will be carefully packaged and discreetly shipped to ensure your security and confidentiality. You'll receive all the necessary supplies and educational materials on time, at the location of your choice.
- **Insurance and financial assistance coordination:** US Specialty Care will coordinate benefit and insurance paperwork, obtain prior authorizations, identify additional options to lower your out-of-pocket costs, and direct you to grants and/or other financial assistance to help bridge benefit gaps.
- **Expert support:** Once you enroll with US Specialty Care you will be assigned a Patient Care Advocate. Your Patient Care Advocate provides counseling, support and education to help you better understand your treatment and manage your condition, and will:
  - Ensure safe and effective use of your medication
  - Discuss how to manage side effects
  - Help you stay on track with your treatment and receive refills on time
  - Review dosing and medication schedules with you, including medications used for other conditions
  - Reinforce proper treatment guidelines

US Specialty Care ensures you have access to the support and tools you need to fully understand your treatment and your condition. We monitor all of your medications to ensure you understand and are following instructions and help manage any side effects you may have. US Specialty Care will also call to remind you of and discuss upcoming refills.
