Program Characteristics: In Target

# **Executive Summary**

The Sex Offense Supervision and Treatment program is a critical public safety function that provides oversight for the comprehensive supervision, treatment and management of approximately 950 adults convicted of sex offenses annually living in Multnomah County. The priorities of this unit are to increase community safety, decrease sexual victimization and reduce recidivism. This program achieves these goals through evidence-based supervision strategies combined with sexual offense specific treatment practices.

### **Program Summary**

Evidence-based supervision of approximately 950 individuals convicted of sex offenses is conducted by certified Sex Offense Specialist Parole/Probation Officers (PPO). High and medium risk individuals are supervised in one field office. In accordance with evidence-based practices, only high and medium risk indigent individuals are eligible for subsidy treatment funds. Individuals identified as lower risk to sexually re-offend are assigned to the Sex Offense Reduced Supervision Caseload (program offer 50056) after a period of documented compliance.

This program requires individuals convicted of sexual offenses to participate in a comprehensive evaluation, sexual offense specific treatment and ongoing evaluation of risk provided by 25 approved community treatment providers. Polygraph examinations are required for monitoring compliance with treatment expectations and supervision conditions.

This program has a direct impact on community safety and maintains high standards for accountability. Research has shown individuals who successfully participate in sexual offense specific treatment are less likely to re offend than those who fail to participate in treatment (Craig et al., 2003; Hanson et al., 2009; Lovins et al., 2009; McGrath et al., 2003). Sexual and general recidivism rates of treated individuals convicted of sexual offenses has also been shown to be lower than recidivism rates of untreated individuals convicted of sex offenses (Looman et al 2000; Hanson et al 2002). The use of polygraph examinations is invaluable in the management and treatment of individuals convicted of sex offenses due to the information gained through the examination process. Furthermore, the use of polygraph examinations is also associated with a decline in recidivism rates (Cole, 2006; Edson et al., 2007; English et al., 2000; Krueger, 2009).

Performance Measures								
Measure Type	Primary Measure	FY16 Actual	FY17 Purchased	FY17 Estimate	FY18 Offer			
Output	Number of adults served annually	947	975	950	950			
Outcome	Percent of adults convicted of a misd. or felony within 1 vear of supervision start date	11%	15%	12%	12%			
Outcome	Percent of adults convicted of a new sex-offense misd. or felony within 1 year of supervision start date	1%	2%	2%	2%			

#### **Performance Measures Descriptions**

## Revenue/Expense Detail
