# **Executive Summary**

Assessment and Treatment for Youth and Families (ATYF) is a unique public safety program serving medium and high risk probation youth with substance abuse, mental health and/or behavioral problems who cannot be effectively treated in community-based programs because of severe delinquency. ATYF provides clinical assessments and outpatient treatment to approximately 130 probationers per year.

## **Program Summary**

ATYF Mental Health Consultants (MHCs) administer an evidence-based clinical assessment, the Global Appraisal of Individual Needs (GAIN) which provides a comprehensive analysis of the youth's risks and needs as well as a level of care determination. The therapists also develop and provide clinical recommendations to help the courts with dispositional planning. This increases the likelihood that youth will receive appropriate treatment without compromising community safety.

ATYF MHCs provide outpatient individual and family treatment in strict adherence to an evidence-based model, Multidimensional Family Therapy (MDFT). MDFT addresses adolescent substance use and behavioral problems as the complex issues that they are. It is strength-based, solution-focused, and incorporates a team approach into the treatment of adolescents. Services are provided in the youth's home, the clinic office, school and other community settings and focus on improving attachments between youth and caregivers, changing anti-social behaviors and reducing drug and alcohol use..

Research shows that youth with untreated substance abuse issues are nearly ten times more likely to become chronic reoffenders. Delinquent youth who receive substance abuse treatment have fewer re-arrests, convictions and detention visits (Cuellar, Markowitz and Libby 2004). ATYF keeps at-risk youth from re-offending and penetrating deeper into the justice system by linking them to treatment services that change their delinquent thinking and behaviors.
