

### Program #50011 - Recovery System of Care

**Program Contact:** Truls Neal

**Department:** Community Justice **Program Offer Type: Existing Operating Program** Program Offer Stage: As Proposed

**Related Programs:** 

**Program Characteristics:** 

# **Executive Summary**

Providing supervised adults with alcohol, drug and or mental health treatment in conjunction with wraparound services is an effective strategy to reduce re-offense, especially for those classified as high risk. These services can include outpatient treatment. Alcohol/drug and mental health treatment addresses a major criminal risk factor and is a necessary correctional intervention if DCJ is to continue to be successful in reducing recidivism. Other services such as vocational assistance, mentoring, and housing are also essential in promoting client success.

## **Program Summary**

This program offer supports a recovery system of care which includes comprehensive support for recovery in addition to treatment, such as stable and drug free housing, peer mentors, and vocational assistance. A recovery system of care better supports long-term behavior change than treatment alone. Alcohol and drug treatment services are provided through contracts with nine non-profit providers. Contracted treatment programs are equipped to respond to culturally-specific needs and to address criminal risk factors in addition to addiction to drugs or alcohol.

With the expansion of Medicaid and private forms of insurance, some clinical services previously supported by the DCJ budget will now be reimbursed through health insurance. DCJ will continue to provide funding for clinical services for individuals eligible for treatment who do not have insurance. In addition, funding is provided to support treatment interventions for criminal risk factors such as antisocial thoughts and attitudes, antisocial peers, impulsivity and poor problem solving skills, anger management and so on. Effective interventions for adults should integrate addictions treatment with treatment for criminality. Without treatment, justice involved adults are more likely to re-offend and/or to occupy expensive jail beds. Treatment has been proven to be effective at reducing recidivism both in Oregon and nationally.

Performance Measures								
Measure Type	Primary Measure	FY16 Actual	FY17 Purchased	FY17 Estimate	FY18 Offer			
Output	Number of individuals that received DCJ funded treatment	669	400	650	650			
Outcome	Percent of individuals convicted of a misd. or felony within 1 year of treatment admission date	18%	25%	20%	20%
