

### BURNSIDE BRIDGE MAINTENANCE PROJECT

## Upcoming Construction

Construction maintenance on the Burnside Bridge has been occurring since spring 2017. Contractors will begin work in certain areas under the east approach starting the week of October 2nd, 2017. Information about upcoming work that **will impact areas on and around NE/SE 3rd Avenue** is provided below.

## Work Zone

**October/November/December 2017**

### Parking Lot

- Parking facilities under bridge will be closed
- Noise during daytime hours

### NE/SE 3rd Avenue

- Temporary lane closures
- Vehicle access will be maintained at a limited capacity
- No full closures
- Bike and pedestrian access will be maintained

## BURNSIDE BRIDGE MAINTENANCE PROJECT

### Project Information

Multnomah County will perform much needed repairs to the Burnside Bridge from April 2017 through November 2019. The project will complete a number of structural, mechanical, electrical and surface repairs to keep the bridge in service another 15-20 years, at which point a major rehabilitation or replacement investment will be made in order to seismically strengthen the bridge.

### Project Schedule

### What Needs Repair?

After 90 years, the bridge has a number of problems that need to be fixed now to maintain safety and operability:

- Some of the concrete is cracked and crumbling
- The electrical system and the parts that raise the bridge need upgrades
- The steel framework on the bridge is rusting
