Program Characteristics: In Target

Executive Summary

Mental Health First Aid is a groundbreaking public education program that helps the public identify, understand, and respond to signs of mental illnesses and substance use disorders. Mental Health First Aid increases mental health literacy in the community, providing a preventive and empowering tool to the community. It provides the public with the education necessary to intervene before an individual potentially reaches mental health crisis. The program offer funds a minimum of two trainings per month with up to 30 participants per training. 772 people were trained in FY17.

Program Summary

Mental Health First Aid is a national program managed, operated and disseminated by the National Council for Behavioral Healthcare, the Maryland Department of Health and Mental Hygiene, and the Missouri Department of Mental Health. The national program trains and certifies instructors to deliver the 8-hour Mental Health First Aid course. There are also Youth Mental Health First Aid and Law Enforcement Mental Health First Aid certifications. The interactive 8-hour course presents an overview of mental illness and substance use disorders, introduces participants to risk factors and warning signs of mental health problems, builds understanding of their impact, and reviews common treatments. Participants of the 8-hour course become certified as Mental Health First Aid-ers and learn a 5-step action plan encompassing the skills, resources and knowledge to help an individual in crisis connect with appropriate professional, peer, social and self-help care. The Mental Health First Aid course has benefited a variety of audiences and key professions, including: primary care professionals, employers and business leaders, faith communities, school personnel and educators, state police and corrections officers, nursing home staff, mental health authorities, state policymakers, volunteers, young people, families and the general public.

In addition to Mental Health First Aid, the Prevention Coordinator has been offering Applied Suicide Intervention Skills Training (ASIST). ASIST is an evidenced based practice to provide suicide first aid. Shown to significantly reduce suicidality, the ASIST model teaches effective intervention skills while helping to build suicide prevention networks in the community. During the two-day interactive session, participants learn to intervene and help prevent risk of suicide. In FY18, we estimate that 150 community members will have been trained in ASIST.

In FY18, we estimate that 587 Multnomah County employees and community members will have been trained in Mental Health First Aid and Youth Mental Health First Aid. In FY19, Mental Health First Aid will continue to be offered to all county employees as well as identified community groups and members who express a need for increased awareness and training in preventing mental health crisis in the community.

Performan	Performance Measures								
Measure Type	Primary Measure	FY17 Actual	FY18 Purchased	FY18 Estimate	FY19 Offer				
Output	# of individuals trained in Mental Health First Aid, ASIST', QPR and/or CALM	772	650	737	700				
Outcome	% of individuals who report greater understanding of mental illness and/or suicide prevention.	87%	88%	86%	86%				

Performance Measures Descriptions

¹ Reduction in number of individuals trained due to reduction in budget.
