

The SUN Service System Results

Educational and economic barriers persist for underserved populations in our community. The SUN Service System represents one strategy for improving educational and economic outcomes for people of color, immigrants and refugees, and those experiencing poverty. We are encouraged to see increased success for the children and families that participate in our services, as demonstrated by the positive outcomes below.

SYSTEM-WIDE RESULTS FY17

35,011

The total number of people who participated in SUN programs in FY17.

72.6%

Percent of people served who are people of color or people from culturally-specific communities.

HELPING STUDENTS SUCCEED

For children and youth who participated regularly in SUN Community School and/or SUN Youth Advocacy services.

86.5%

Target = 90%

Percent of students who attended school consistently (were not chronically absent), a key predictor of academic success. The district average was 80.2%.

77.8%

Target = 80%

Percent of 9th graders who earned the 6 or more credits to be on track to graduate on time.

94.4%

Percent of 12th graders who graduated.*

PREPARING CHILDREN FOR SCHOOL

For children and parents/caregivers who participated in Parent Child Development Services.

90.0%

Target = 90%

Percent of children who had up-to-date immunizations.

KEEPING FAMILIES STABLE

For households that participated in Multnomah Stability Initiative services.

90.9%

Target = 85%

Percent of families who participated that were in permanent housing at exit.
