The Story We Want to Tell from 3/2/2018

Group 1

- Mental health discussion partnership with DHS other agencies? To suggestion
- Creates a platform for response to emerging issues
- Integrated results
    o Academic performance
    o Homelessness
    o Mental health
- Shared investment/ Who's at the table?
- Describe and affirm values. How do we operationalize them?
- Info that is helpful with sceptics, cynics

Group 2
- Reynolds: SUN provides an expansion of the services that the district provides. These services are critical to the mission of the district, but are the areas that we as a district are not funded to support. SUN leverages capacity by organizing partners
- City of Portland: Idea of expansion and compliment vs. filling in the gaps or "catchment". To what extent does the SUN service system expand and compliment services that are already being provided, vs. to what extent does the SUN service system serve to fill in the gaps of what partners can't do
- DHS: I think the success story here is that no single agency can do it alone. It's about our collective agency, but we need more detailed evidence for that
- How could we show evidence of "Collective Impact", and multi-agency coordination? In a way that reflects the success of SUN as well as its partners
- Really it's about our definition of success. By specific organizations, by funders, and by partners. However, it should really be starting with our definition of student success. That's what's fundamental. That's how we lower barriers.
