Executive Summary

The Facilities Construction Management and Design program is responsible for supporting the goals, objectives and priorities of the County through the delivery of large scale facilities construction projects. These projects are critical to creating an efficient building portfolio that serve employee and public access needs while prudently investing taxpayer dollars.

Program Summary

The County envisions completing \$300 million to \$400 million of new facility construction, remodeling, redevelopment and recapitalization over the next decade. This program is responsible for real estate development, engineering design, construction, and project management for new construction and/or repair and alterations for complex, multi-use, public facilities.

The team of Professional Engineers is responsible for managing the planning, scheduling and coordination of major design and construction projects. This includes performing complex risk management, public process and other management functions. Integrating several disciplines into the design to achieve efficient building operations and maintenance is of utmost importance.

Key projects include the new Health Department Head Quarters to replace the McCoy Building and planning for a replacement facility for the Downtown Courthouse.
