Program Characteristics:

Executive Summary

Data and Reporting Services provides and supports reliable services and software systems that are used across departmental boundaries and serve more than one or all County lines of business. Services include geographic maps, platform support for databases, web server support, and reporting tools used for decision making and results measurement.

Program Summary

GIS services include taxation mapping and tax collection analysis, land use planning, bridge and road planning, crime tracking, law enforcement planning, demographic/population analysis and emergency management and mitigation.

Web Services provide the standard platforms for applications that enable access via the internet/intranet to County program information, citizen self-serve/direct access to County services, and electronic transaction processing.

Database and Reporting services provide the data storage and reporting structure and tools to allow information access and sharing with the public, County departments, and external business partners.

All services include understanding and defining enterprise business needs, recommending effective and innovative technology solutions, constructing and upgrading platforms as required and ensuring the integrity and security of the platforms.

Measures are focused on increasing the amount of customer work vs IT and administrative work as well as up time, in general, for the platform.

Table with 6 columns: Measure Type, Primary Measure, FY13 Actual, FY14 Purchased, FY14 Estimate, FY15 Offer. Rows include Output and Outcome measures.

Performance Measures Descriptions

Output Measure - measures the amount of time employees are working on direct customer tasks.

Outcome measure - measures the availability of production systems. The goal is minimum disruption in business processes and services due to system outages.
