

**Division:** Facilities & Property Management

**Program Characteristics:**

**Program Description**

The Facilities' Utilities program accounts for the costs of essential utilities, such as electricity, natural gas, water, sewer, and waste services across all County facilities. The program aims to reduce utility consumption, lower operational costs, and cut carbon emissions in alignment with County climate policies and the County's Climate Action Plan.

Key aspects of the program include:

- > Service Provision: Ensure utilities are available for all departments to deliver public services (e.g., heating/cooling for clinics, lighting for libraries, water for detention facilities).
- > Oversight and Efficiency: Identify and implement energy and water efficiency projects to reduce usage and manage utility accounts.
- > Expenses are passed through to departments based on their facility occupancy.

**Equity Statement**

The Utilities program's efforts to reduce emissions align with the County's mission to serve vulnerable populations who are disproportionately affected by climate change impacts.
