Executive Summary

The Strategic Planning and Projects Program is responsible for developing, implementing, and tracking performance against the Facilities Asset Strategic Plan. The program delivers large scale facilities construction projects, evaluates and recommends strategic portfolio opportunities including acquisitions, dispositions, major project development, renovations, and strategic programming.

Program Summary

The Facilities Strategic Planning and Project program includes the ongoing efforts relating to the Facilities Asset Strategic Plan (FASP); new and major redevelopment construction projects; property disposition and acquisition; pre-development and evaluation of major portfolio projects.

Phase II of the Facilities Strategic Planning initiated the assessment of potential renovation, modernization and seismic to determine the cost/benefit of specific investments in the portfolio. Condition assessments, cost estimates and programming evaluation continued in FY 2017. In FY 2018, the program focus is on continuing the assessments on medium and poor performance buildings and commencing on the cost/benefit analysis to identify investment priorities.

The County envisions completing \$450 million to \$600 million of new facility construction, remodeling, redevelopment and recapitalization over the next decade. This program is responsible for real estate development, engineering design, construction, and project management for new construction and/or repair and alterations for complex, multi-use, public facilities. This includes performing complex risk management, public process and other management functions. Integrating several disciplines into the design to achieve efficient building operations and maintenance is of utmost importance.
