**Program Description**

The Albina Library project will result in approximately 46,000 sf of new and renovated library space and administrative offices on the existing Knott Street/Isom site. Project decisions considerations include Library values and goals as outlined in the strategic plan, equity for staff and community members, environmental sustainability, operational efficiency, and fiscal responsibility.

This multi-year project continues construction in FY 2025. Construction is expected to be completed in late FY 2025 and the branch opened to the public in early FY 2026. When completed, the site will include ~31,000 sf allocated to a new library space and ~15,000 sf allocated to library executive administration space and storage on the existing Isom/Knott Street site. The historic Knott Street building will be renovated, while the Isom building and the garage have been removed for a much larger, more open expansion of the library. The project has a goal for COBID (Certification Office for Business Inclusion and Diversity) certified firm participation in construction of 25% over the life of the project and is expected to achieve ~38% participation.

The new Albina Library will be a destination library - a location 30,000 to 60,000 sf, providing a rich variety of services, resources and spaces to meet diverse community needs. This will be the largest public library in northeast and north Portland, providing ample space for regional activities and is one project, among many in the area, that brings new opportunities to a historically marginalized community. Based on input from the community, this branch will feature an outdoor courtyard for community members to relax and connect; large community and meeting rooms; expanded study spaces, teen room with space for technology, homework, and creative expression; updated technology and internet; and new art that represents the community.

Community outreach and engagement utilized diverse approaches through virtual, in-person and additional community meetings with translation and interpretation services. The building design received input from the Youth Opportunity Design Approach (YODA), paid teen community members who joined the design team. Key activities include robust community engagement to inform design and onboarding of paid teen positions to participate in the project.
