Program Characteristics:

Executive Summary

The Northwest Library project builds out a roughly 10,000 square foot new library at a new building/site, transitioning from leased to owned property. Project decision considerations include Library pillars, priorities, environmental sustainability and operational efficiencies.

Program Description

This multi-year project purchased a building in FY 2022 and is currently being used as an interim space for the library system supporting other bond projects. The project completed procurement of the branch design and construction team, started community engagement, and started design in FY 2023. Construction is expected to start in early FY 2025. The new library will be roughly 10,000 square feet at a new building/site, more than doubling the size of the existing library. The transition from leased to owned property achieves a key property goal of the Framework for Future Library Spaces. The project has a minimum aspirational goal for COBID (Certification Office for Business Inclusion and Diversity) certified firm participation in construction of 20% over the life of the project.

The new Northwest Library will be a neighborhood library - a location smaller than 30,000 square feet that provides limited amenities and a community-driven collection.

Since 2000, the Northwest Library has called a historic building at NW 23rd Avenue and NW Thurman Street home. As part of the 2017 Framework for Future Library Spaces lays out, future sustainability for the library organization includes moving from leased to owned facilities. This project will shift Northwest Library from a leased building to a purchased property.
