Executive Summary

The Justice Center Critical Electrical System Upgrade Bus Duct Replacement program offer is for early construction work to replace the electrical Bus Duct System. In FY 2023, early construction phase costs are \$2M (\$1.2M County and \$0.8M City of Portland). Electrical system at Justice Center is the County's greatest operational risk given the system's poor condition and the impact of a system failure. Failure of this system could result in needing to relocate all occupants. The total estimated cost to replace the system is estimated at \$24 million as of January 2022.

Program Description

The Justice Center building's incoming building electrical service, bus ducts, and electrical distribution equipment are mostly of original construction (1981), are in poor condition, include sections that cannot be maintained, and is in need of replacement. Failure of these systems could result in a complete electrical outage and require the building to be vacated for a year or more. Project is intended to be split the costs with the City of Portland with 59% of the project paid for by the County and 41% by the City, based on the building's occupancy split.
