**Program Description** 

The purpose of the Vance Property Framework Plan program is to manage ongoing assessment of the site for potential future uses. Work in FY 2026 will include environmental site technical studies and outreach work associated with future park and open space planning. Work completed to date includes an American Land Title Association (ALTA) Survey, gas and water monitoring, landfill waste field investigations, installation of additional ground water monitoring stations, wetland delineation, and the development of a redevelopment vision for the property in collaboration with community partners. In FY 2022, the Board of County Commissioners received a Vance Vision report which outlined ideas for future development on the property including consideration for the needs of the County's Transportation division. Community stakeholders in the visioning work have included members from the Governor's Regional Solutions team, the City of Gresham, Metro, and the Port of Portland. In FY 2026, communication will continue between the County and community partners to identify funding opportunities for additional planning and design. Areas for continued assessment include zoning, park and open space development, and opportunities for economic development through the development of parts of the property.
