Program Characteristics: In Target

### **Executive Summary**

The IT Planning, Projects, and Portfolio Management offer focuses on the processes, procedures, and tools necessary to support the successful management of strategic IT projects. The program also includes oversight of the one-time-only Board of County Commissioners approved projects, as well as ensuring project management standards and processes are in place across the Department of County Assets Division of Information Technology.

## **Program Summary**

The program includes the staff responsible for developing and implementing industry standards for managing IT projects, especially high-risk capital projects. Skilled project managers provide the hands-on expertise needed to successfully manage risk and complete these projects following adopted project management practices. This program coordinates and manages the quarterly strategic planning and review process. The quarterly planning process ensures that the right resources are focused on the strategic IT projects within the County. The output from these meetings is shared with departmental leaders countywide. The program also includes contract/vendor/partner management for outsourcing and/or intergovernmental agreements associated with strategic projects. In FY 2017, the full IT Project Portfolio consisted of 294 projects active during the course of the year and 165 projects that were completed during the year. The Planning, Projects, and Portfolio Management group maintains the County's Digital Strategy Priority Projects Portfolio consisting of approximately 20 of the highest priority projects across the County. Progress on the projects within this portfolio are reported and shared monthly through the County's intranet.
