**Program Characteristics:**

**Executive Summary**

The Juvenile Detention Program located at the Juvenile Justice Center provides health care services to youth. Currently, the medical records are paper-based. This is inefficient. In addition, the use of a non-electronic medical record poses potential challenges for legibility, accuracy, continuity of care and medical-legal issues. This program is to establish requirements to procure and implement an EMR that meets the unique needs of this care facility.

**Program Summary**

The staff at JDH currently use a paper-based medical record system and document medication delivery on paper medication administration records. Handwritten prescriptions are used to order medications. Laboratory and other test results return and are filed as paper records. This program will document the requirements for an EMR, conduct a procurement, and implement the selected solution. This program will require significant business process design to automate paper-based practices.
