Testimony:

Hello,

I am writing to express my support for the North Tualatin Mountains Access Master Plan. I have spent my entire life as an outdoors person, eagle scout, hiker, bird watcher, wildlife advocate, and mountain biker. I strive to appreciate nature, often on a bicycle. I have been fortunate to view cougar, bobcat, badger, black bears, elk, deer, mountain goats, and many more animals all while riding a mountain bike. Please allow access and do not place further restrictions on the plan as 2 very large parcels have already limited opportunity for bike access. If the plan allowed diffuse access throughout the 4 parcels less concentrated impacts will occur. Please see the image of the deer that I saw while riding a bike in Portland. We can all share with each other, and while maintaining sensitive wildlife habitat. Other municipalities provide shared trails and they are great! Please do the same. Listen to science and reason please, and allow mountain bike access to the trail systems.

Thank you.
