Testimony: I would like to comment in favor of the proposed land use plan for the North Tualatin Mountains. This would provide a close in option for my preferred way of enjoying nature. Research and experience shows that well built and supported trails can coexist with goals of protecting nature (see Stubb Stewart State Park and Sandy Ridge as examples of well designed trails with a lot of volunteer support to help maintain). Trail design can also go a long way to help provide trails that are safe and fun for a variety of users including kids and families. Thank you for the consideration
