

**Multnomah County
Arterials and Collector
Roads
in NPDES Area**

- Road UICs
- County Roads MS4
- UIC
- No curb

NOTES:

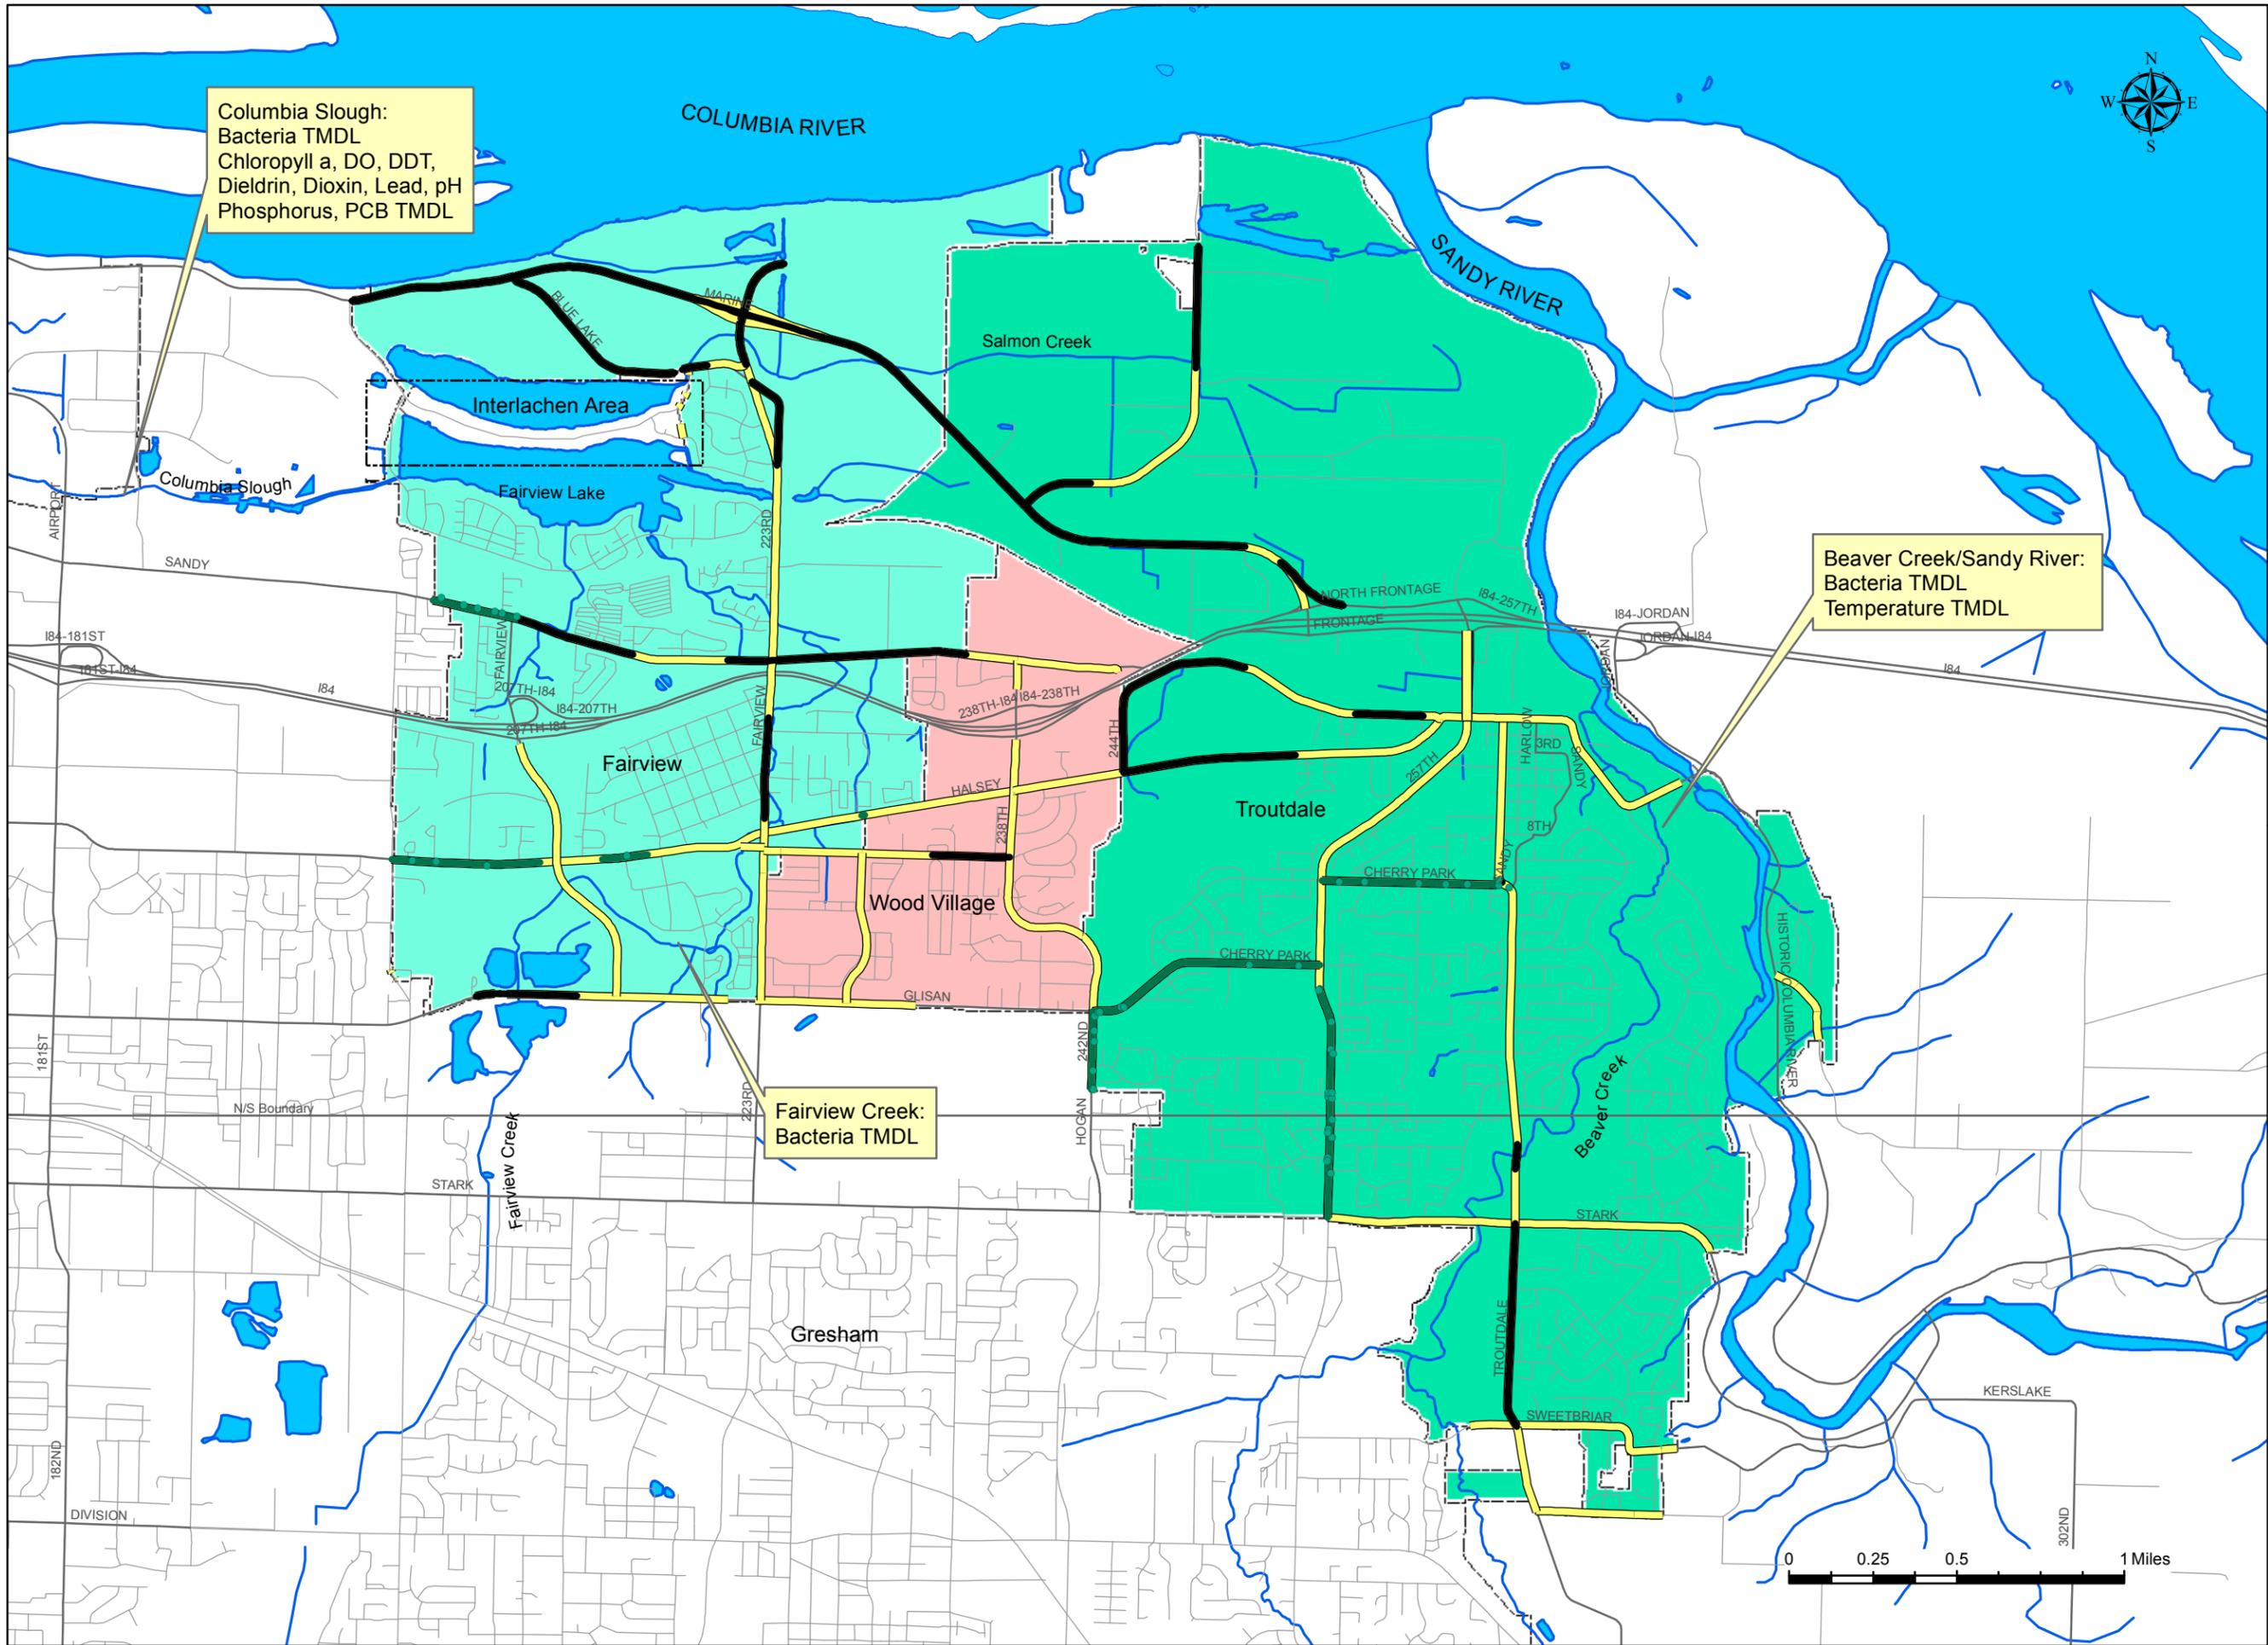

Road segments without curbs sheetflow runoff onto the right of way and do not discharge to surface waters.

Road segments with underground injection controls (UIC) infiltrate stormwater into the subsurface.

The Interlachen Area is the only urban area where the County retains land use authority. The majority of the homes in this area do not contribute runoff to the County MS4, rather runoff would discharge directly to Blue Lake or Fairview Lake.

April 2013
