# Measure Argument for County Voters' Pamphlet

Measure # 26 - 163 (Order # \_\_\_\_\_)

Maximum 325 words/numbers.

The previous two failed bond measures cited safety concerns as the top priority. In this proposal safety has taken a back seat to size.

Federal grant money is available for seismic upgrades, our administration feels those monies aren't ideal as they won't address the other facility needs we have campus wide. Yet here we are now with a bond proposal that also does not address those other needs.

Based on conversations by the school board we can be assured that in a few years they will ask for another bond to address the other projects that should be done now.

This bond proposal could have easily renovated the Middle School, or even built new on a smaller scale, and had money left to address the other safety concerns. Instead they are building a larger school and adding a separate science complex for a STEM High School. The current plan adds approximately 14,000 sqft to our campus above currently used space.

The number of added classrooms means little when they range in size from 830 sqft to 1,700 sqft., as larger ones can easily be split into 2. This is exactly how the district expanded our district before, and now they're out of room. More square footage = the potential for more out of area students. While only residents pay for the facilities.

Corbett Charter School still exists in our Grade School Library, and 472 Charter students have joined the District Schools through "open enrollment". The Charter High School has been replaced with a STEM High School. We now have 6 schools in our small community.

Operating funds are used for salaries to add teachers and principals. Yet we're told we have no money for building maintenance or facility needs.

A no vote will not only help to curb the expansion of our schools, it will also send the message that the community expects to see some sensibility return to our school district.

Please Vote No.
