At the end of that term they may run again for another term but after two complete terms they will then be deemed termed out unless there are no other individuals nominated for the position. Any partial term more than 1 and 1/2 years shall be deemed a full term and the member may run again for that same position but shall be deemed termed out after the end of the second term.</p> <p>III. The Behavioral Health Division's M-ITT team follows up with Healthshare of Oregon Medicaid enrolled individuals who do not have mental health services at the time of admission to a psychiatric hospitalization. M-ITT connects individuals with long term behavioral health, substance use treatment, primary care and specialty services. M-ITT is a flexible, low-barrier, collaborative, intensive, short-term transitional support intervention to ensure clients get connected to services. The goal of the M-ITT program is to provide continuity of care following hospital discharge, connect individuals to ongoing specialty services, and reduce inpatient readmissions.

The Call Center coordinates emergency behavioral health services (mental health and substance use) for all callers regardless of resident status, insurance, or other demographic. For many, the Behavioral Health Call Center is the front door to a continuum of services. When a call is received from a community member, the Call Center provides supporting listening, information and referral. In some cases, additional direct support, mobile crisis intervention teams may be dispatched. The Behavioral Health Call Center partners with community providers, as well as other County and City entities to support a full continuum of care and resources. Services are provided in the language of choice by the caller through either in-house interpretation or contracted services.

- **Direct Clinical Services**

This program was created as a direct response to the increase of Gun violence, shootings, and homicides in Multnomah County. Gun violence is a racial justice issue that is fueled by discrimination and structural inequities in our society. Gun violence in Multnomah County is disproportionately impacting our African American, Latino, Asian and African Refugee communities. Multiple community organizations and community leaders have been proactively addressing community gun violence for decades, working side by side with the communities most impacted and advocating for racial justice. Originally funded in 2021, this specific BH Response Team provides direct mental health services to youth (age 10-25) and their families impacted by gun violence, specifically focusing on the African American, Latino and African Refugee communities.
