

-----Addendum to-----

Pipelines Stormwater Management Report

Bull Run Filtration Pipelines Project

Multnomah County, Oregon

Emerio Project Number: 0545-006

City of Portland Permit Numbers: TBD

This addendum was prepared in support of the City of Portland Water Bureau's Bull Run Filtration Pipelines Project land use applications in Multnomah County and reflects the current status of the project design, which includes the following changes: The Lusted Finished Water Pipeline (LFWP) has been removed from the scope, such that the pipeline route in Dodge Park Blvd which previously included two parallel pipelines now only includes one pipeline. This change in pipeline design has no effect on the conclusions of this stormwater report and requires no revision to the stormwater management approach. The design is subject to change and has been prepared for the specific purpose of addressing conformance of the project to the Multnomah County land use requirements as expressed in the Multnomah County Code.

I hereby certify that this Stormwater Management Report for this project has been prepared by me or under my supervision and meets minimum standards of the Multnomah County Design and Construction Manual (MCDCM) and normal standards of engineering practice. I hereby acknowledge and agree that the jurisdiction does not and will not assume liability for the sufficiency, suitability, or performance of drainage facilities designed by me.
