

Petition to Stop Portland's Water Treatment Plant at Carpenter Lane

BACKGROUND
 The City of Portland proposes to build a 90-acre water treatment plant near Carpenter Lane within the communities of Pleasant Home and Cottrell. The plant will cost over \$1 billion and will dramatically change the character of our rural community. The Portland Water Bureau has numerous other site selection options, as well as much less expensive and less impactful alternatives for treating their water.

ACTION
 We, the undersigned, oppose the City of Portland's proposed water treatment plant at Carpenter Lane in rural East Multnomah County. We urge Portland City Council and our local regional representatives to stop this harmful project. We also urge development planners at Multnomah and Clackamas County to reject the Portland Water Bureau's proposal to build at this site.

Petition to Stop Portland's Water Treatment Plant at Carpenter Lane

BACKGROUND	The City of Portland proposes to build a 90-acre water treatment plant near Carpenter Lane within the communities of Pleasant Home and Cottrell. The plant will cost over \$1 billion and will dramatically change the character of our rural community. The Portland Water Bureau has numerous other site selection options, as well as much less expensive and less impactful alternatives for treating their water.
ACTION	We, the undersigned, oppose the City of Portland's proposed water treatment plant at Carpenter Lane in rural East Multnomah County. We urge Portland City Council and our local regional representatives to stop this harmful project. We also urge development planners at Multnomah and Clackamas County to reject the Portland Water Bureau's proposal to build at this site.

Petition to Stop Portland's Water Treatment Plant at Carpenter Lane

BACKGROUND	The City of Portland proposes to build a 90-acre water treatment plant near Carpenter Lane within the communities of Pleasant Home and Cottrell. The plant will cost over \$1 billion and will dramatically change the character of our rural community. The Portland Water Bureau has numerous other site selection options, as well as much less expensive and less impactful alternatives for treating their water.
ACTION	We, the undersigned, oppose the City of Portland's proposed water treatment plant at Carpenter Lane in rural East Multnomah County. We urge Portland City Council and our local regional representatives to stop this harmful project. We also urge development planners at Multnomah and Clackamas County to reject the Portland Water Bureau's proposal to build at this site.
